## EDUCATION

### BS Data Science

PAF-IAST, Haripur

*Expected 2028*

### FSc Computer Science

Jinnah Jam-e School & College

2024

## KEY COMPETENCIES

- Problem-Solving & Analytical Thinking
- Data-Driven Decision Making
- Statistical Analysis & Modeling
- Team Collaboration
- Research & Documentation
- Continuous Learning Mindset

## CERTIFICATIONS

### DecodeLabs Internship — Data Analytics

*Jun 2026*

### Certified Data Scientist — PM Accelerator

*Jun 2026*

### Power BI for Beginners — Simplilearn

*Apr 2026*

### Introduction to SQL

*Jan 2026*

### SQL (Basic) — HackerRank

*Jan 2026*

### Data Analytics Job Sim — Deloitte

*Dec 2025*

### Data Science Internship — Ai Data House

*Aug 2025*

## PROFESSIONAL SUMMARY

BS Data Science student at PAF-IAST with hands-on industry experience — built and deployed a real-time License Plate Recognition system achieving 15–20x faster CPU inference via async optimization, and a predictive ML model hitting  $R^2 = 0.997$  with Random Forest.

Proven full-stack and systems developer with 4 shipped projects spanning computer vision, supply chain management, network monitoring, and data pipelines — using Python, Flask, YOLOv8, Bash, and SQL across the stack.

Certified in Power BI, SQL, and Data Analytics (Deloitte) with internship experience at Ai Data House, where I applied end-to-end ML workflows — actively seeking opportunities to deliver data-driven solutions at scale.

## EXPERIENCE

### Data Analytics Intern | DecodeLabs | *May 2026 – June 2026*

- Completed a virtual internship in Data Analytics, working on real-world datasets.
- Applied data cleaning, exploratory data analysis, and visualization techniques.
- Delivered analytical insights and reports as part of a structured curriculum.

### Data Science Intern | Ai Data House | *July 2025 – August 2025*

- Acquired foundational skills in data science and applied them to real-world datasets.
- Gained hands-on experience in data analysis and machine learning techniques.
- Demonstrated strong commitment to learning and professional growth in a team setting.

## ACADEMIC PROJECTS

### Real-Time License Plate Recognition — Computer Vision / ML Engineer

*Python · YOLOv8 · EasyOCR · OpenCV · Flask · Vercel*

- Built an end-to-end AI pipeline detecting vehicles with YOLOv8, localizing license plates via Haar Cascades + contour heuristics, and reading text with EasyOCR.
- Achieved ~0.6 seconds/frame inference on CPU — 15–20x faster than baseline — via async threads, lazy model loading, and resolution capping.
- Deployed a full dark-mode web dashboard (Flask + MJPEG stream) with live webcam mode and CLI support; hosted live on Vercel.

### Fleet Logistics Pro — Full-Stack Developer

*Smart Supply Chain Management System with real-time tracking and automated updates.*

- Built a full-stack web application for supply chain operations using Python (Flask), SQLite, HTML5/CSS3 (Tailwind), JavaScript, and Leaflet.js.
- Implemented real-time shipment tracking and automated status update workflows.

### Global Suicide Rate Analysis — Data Scientist / ML Engineer

*Machine Learning for Mental Health — 30-year global dataset analysis.*

- Analyzed 30 years of global data using machine learning to identify high-risk patterns.
- Achieved  $R^2 = 0.997$  with a Random Forest model, significantly outperforming traditional regression methods.
- Performed comprehensive data cleaning, EDA, and feature engineering on multi-country datasets.

### Net Pulse — Network Monitor — Systems Developer

*GUI-based network monitoring tool built with Bash and Zenity for Linux.*

- Built a full GUI network monitoring application in Bash using Zenity dialogs — no external frameworks required.

- Implemented real-time ping-based uptime tracking with configurable servers and intervals, plus automatic alerts on connection loss or recovery.
- Designed persistent session logging with final uptime % reports and a clean stop/start workflow.

### **Dress by Diya** — Full-Stack Web Developer

*HTML5 · CSS3 · JavaScript · Tailwind CSS* | [dressbydiya.me](https://dressbydiya.me)

- Designed and developed a full e-commerce fashion website for an elegant Pakistani clothing brand — live at [dressbydiya.me](https://dressbydiya.me).
- Built responsive product collections, custom order flow, and mobile-first shopping experience with WhatsApp-based ordering and nationwide delivery integration.

## **TECHNICAL SKILLS**

---

**Languages:** Python, SQL, C++

**Data Analytics:** Matplotlib, Seaborn, Plotly, MS SQL, MongoDB, Tableau, Power BI

**ML / DL:** Scikit-learn, TensorFlow, PyTorch, Keras

**Tools:** Jupyter Notebooks, Flask, Git, VS Code

## **PROFESSIONAL DEVELOPMENT**

---

- Active participant in tech seminars and workshops on emerging data science trends.
- Member of student research groups focused on machine learning applications.
- Continuously learning new technologies — currently exploring advanced ML and deep learning frameworks.
